

HOW TO MEASURE YOUR COUNTERTOPS

MEASURING EXISTING COUNTERTOP

Step 1 – Length

To measure the length of your existing countertop, measure along the wall from one edge to the opposite edge.

Step 2 – Width

To measure the width of your existing countertop, measure from the back wall to the finished front edge.

** If your existing countertop has a backsplash be sure to factor in the thickness*

MEASURING NEW CABINETS

Step 1 – Length

To measure the length of your new countertop, measure along the wall from one edge of the cabinets to the opposite edge of the cabinets.

Step 2 – Width

To measure the width of your new countertop, measure from the back wall to the front of the cabinet.

Be sure to add 1 1/2" to the dimension for overhang.

** Every rounded piece should be measured as if it were rectangular in shape. Measure the furthest distance possible from the rounded side to the opposite side.*
